aricks australia

IN THIS EDITION

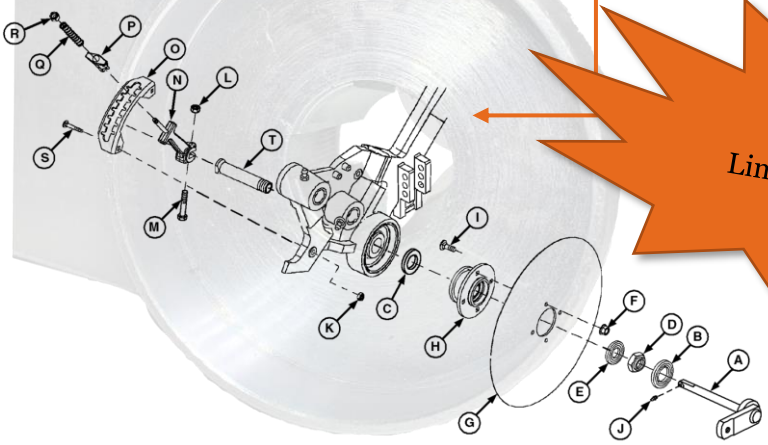
* Gauge Wheel Axles
* Fine Cover Plate
* Lifting Legs
* South Australia
* Maintenance - Book in Before Xmas
* Parts List
* The Usual Stuff

Hi All, hope everyone is well and battling through. We've had some very tough times recently with drought, fires and even flash flooding. These events affect us all in one way or another, some more than most. Our thoughts are with each and everyone of you experiencing tough times on the land. Let's hope the next few years bring about a change for the better.

The wait is over

Our non-greasing axles are finally ready! I'm sure you have all had seized gauge wheel arms and been unable to adjust your depth at some point. It has taken SIX years but we finally have a solution. Our new non greasing gauge wheel axles will be the turning point in eliminating these jammed axles. Our new product will replace the following parts – A, B, D, J & T Parts reference. These parts alone cost in excess of $235 AUD inc gst.

Normally part N is also replaced but with our new system your damaged/worn depth adjustment arm can be re-used, saving another $185 AUD inc gst.



Limited supply, call now to reserve yours

Fine Cover plate

Introducing our new fine-toothed cover plate. Equivalent increments to the original JD model yet..... ***built stronger to last longer!***

Couple with our solid tab T handles for an indestructible system

Maintenance

Well the guys have finally spat the dummy and invented a better way to service your seeder.

Using state of the art Razor International technology, coupled with Jost Lifting legs, Colin has adapted a system to save time, money and his back.

Currently capable of raising box drills and up to 43ft air seeders, with plans to adapt to 50ft & 60ft already underway.

Check out these pic's

South Australia – We are coming!!!!

Due to demand we are now including SA in our Annual Onsite Maintenance trips.

Advanced bookings necessary

Parts Range

We are slowly increasing our aftermarket product range to help make your machine as reliable as we can. We don't intend to stop there either. If you have an issue with the longevity of a JD product on your 1590, 1890 or 1895, let us know and we will see if we can help.

We all get our fair share of unwanted emails and its annoying, so if you do not wish to receive our newsletter please reply to our email with the words UNSUBSCRIBE.

February 2020

In Oct 2019, we welcomed Damien (Damo) to the Aricks Family.

Damo joins us with a Fitter Machinist background and has excellent mechanical knowledge.

He is enjoying learning all about JD Disc seeders and keeping Colin on schedule.

Also a keen motorcycle enthusiast, Damo hates a VB at the end of a busy day.

ON-SITE MAINTENANCE

Our servicing schedule is growing each year. Due to the high demand we strongly encourage you to book in early. It is best to call prior to Christmas, (yes, this early), if you want your seeder on the maintenance list for the following sowing season. We also perform onsite maintenance all year round, so perhaps this would be a better consideration to guarantee a visit from the guys.

Can you Help us? Please. We need some generous farmers who are willing to let us film their machines whilst sowing. Unlike previous media recordings, we no longer need to interrupt your sowing time. We have a drone that we can fly alongside you without having to disturb you at all. We also need some new Aricks wheel trials. If you are willing to help in either of these areas, please contact Jacqui 0418865125 to arrange. All you need is a JD 1590, 1890 or 1895 and we will do the rest.

IT'S ABOUT TIME

We have finally joined Twitter, better late than never
