aricks australia

Well, what a ripper start to the new year, although it has been a little damp at times. We are undertaking some major progressive changes to our business this year with the inclusion of new products, courtesy of Farmscan Australia, and the construction of a new Warehouse, Workshop and Office complex. We have outgrown our current premises and need to expand our rapidly growing enterprise. See concept drawings below

FARMSCAN

ELECTRONICS FOR AGRICULTURE

We are delighted to announce our new venture with Farmscan. Aricks Australia is now and authorised retailer for all products available from Farmscan. Listed below are a few of their most popular products

G7 EZY FARMNAVIGATOR

Intelligent farming made easy Basic Guidance + Visual Automatic Section Control. If you thought Intelligent Farming technology was not for you, the G7 Ezy Farmnavigator will change your mind. Affordable and easy to use, it can be adopted by farms of any size.

JACKAL SPRAY MONITOR

Compact & easy to use with 3 sections. With only 3 buttons available across the top of the Jackal our simplified layout will make upgrading your old 2400/Hardi or other spray controller a breeze. It's also possible to join a 4th section if required to allow further expansion .

IntelligentAg

The Recon Wireless Blockage and Flow Monitor provides reliable, versatile machine monitoring technology to improve precision in every pass. Unlike traditional optical sensors, our patented acoustic sensors monitor the sound of the seed flow so you can depend on accurate readings even if the sensors get dusty. The system is easy-to-install and can adapt to nearly any brand of equipment for a variety of applications. Its software is compatible with your iPad to provide a simple, user-friendly interface that displays all manifold runs and gives you an audible alert if a run becomes blocked.

NEW PRODUCT – SEED TUBES

We are always looking for new ideas and products to expand our extensive range, steel seed tubes have been around for Donkeys years. Aricks Australia have developed a new version aimed at combatting rust that causes jamming and swelling making it difficult to remove them. Our new Stainless Steel Seed Tubes are designed to be durable and user friendly with a smart powder coated finish.

Does your Gauge Wheel Axle become seized?

Have you heard of our non greasing gauge wheel axles?

- patented design,
- splined arm connection,
- high tensile spindle incorporating self-lubricating bushes
- high tensile stainless-steel axle
- extremely effective and durable seal to keep the axle shaft dust free
- solid axle shaft attachment point – increased surface contact

February 2022

Mother Nature blessed us recently with a 180mm deluge within a few hours here at Corowa. The town suffered extensive flooding with several houses inundated and a substantial amount of water laying around the industrial estate. We have never seen an event like this in our 30 years in the region. We were very lucky to escape with minor disruption and minimal loss and damage.

New Exapta stock just arrived

20% STRONGER

exapta solutions, inc.

Exapta ninja seed tabs video

Seed Boot Replacement

When installing seed boots using our shouldered bolt and nut, we recommend the use of a thread locking compound such as Loctite 243, as pictured.

Onsite Servicing

A second service truck is on the way!!! Due to high demand and an increasing number of machines in our regions we have taken the plunge and decided to set up a second Onsite Service Truck. We hope to have this up and running within the month to better service our customers.

Parts Range

We are slowly increasing our aftermarket product range to help make your machine as reliable as we can. We don't intend to stop there either. If you have an issue with the longevity of a JD product on your 1590, 1890 or 1895, let us know and we will see if we can help.

We all get our fair share of unwanted emails and its annoying, so if you do not wish to receive our newsletter, please reply to our email with the words UNSUBSCRIBE.
